

## PREREQUISITES

### Software

Team ID	PNT2022TMID06857
Project Name	IoT Based Safety Gadget for Child Safety Monitoring & Notification

The image shows a screenshot of the Wokwi website, which is a platform for simulating IoT projects in a browser. The website has a dark theme and features a navigation bar with links to the Discord Community and Facebook Group. A central banner invites users to stay updated by entering their email address. Below this, there are sections for 'Featured Simulation Projects' and 'Quick Start Templates'. The 'Featured Simulation Projects' section displays six project thumbnails: 'Simon Game with Score', 'Nano Pong', '32x32 LED Matrix Tunnel', 'Mini Etch-a-Sketch', 'Arduino Calculator', and 'Alarm Clock with RTC'. The 'Quick Start Templates' section shows three templates: 'Arduino Uno', 'Raspberry Pi 4', and 'Raspberry Pi 3'. In the foreground, a Windows Command Prompt window is open, showing the command 'python --version' and its output 'Python 3.11.0'.
